

Status of FAA Performance Targets

TGT: Single Index 2006 (FAA) This Month (Last Value)

Description

TGT: By FY 2006, implement a single, comprehensive index that provides a meaningful measure of the safety performance of the U.S. civil aviation system. (FY 2004 target is to develop a workshop by June 2004.)

The table indicates that the FAA is meeting all its milestones to achieve its performance target in FY 2004.

Period Table

	Actual	Target (Line)	Target (Line) - Index Range
10/2003	3	3	Green
11/2003	3	3	Green
12/2003	3	3	Green
01/2004	3	3	Green
02/2004	3	3	Green
03/2004	3	3	Green
04/2004	3	3	Green
05/2004	3	3	Green
06/2004	3	3	Green
07/2004	3	3	Green
08/2004	3	3	Green
09/2004	3	3	Green

Commentary (09/2004)

Target Achieved. The FAA plans to implement a single, comprehensive index that provides a meaningful measure of the safety performance of the U.S. civil aviation system by FY 2006. Achieving this performance target requires meeting and gaining consensus with government, industry and academic experts. The FAA hosted an initial workshop on January 21, 2004. Key experts and stakeholders met to begin developing a Composite Safety Index. The participants began to evaluate accepted index models in an effort to achieve consensus. We are coordinating with Professor Arnie Barnett of MIT to schedule a second Safety Index workshop in November 2004.
