

AIRPORT CERTIFICATION INFORMATION BULLETIN

Everyone's cooperation is necessary to prevent potentially serious accidents on airports. The FAA has an ongoing program aimed at helping to reduce runway incursions, pilot/controller miscommunications and airport surface mishaps. Employees who operate ground vehicles or equipment on airports have key responsibilities in these efforts.

Consistent with our continuing efforts to reduce runway incursions by increasing awareness, we are providing you copies of the booklet titled *Airport Ground Vehicle Operations* to share with vehicle operators at your airport. The guide provides a general overview of safe procedures for driving on an airport. If you would like to order additional copies, please contact your certification inspector.
