

# AIRPORT CERTIFICATION INFORMATION BULLETIN

Airport ground vehicle operators can reduce the risk of being involved in a runway incursion by improving communication skills, knowledge of airport taxiways and runways, and ground vehicle radio communications. The enclosed pamphlet, titled *Runway Incursions*, contains information on ways to reduce the likelihood of surface incidents and increase awareness at your airport. Please feel free to contact your certification inspector to obtain additional copies.

**SURFACE SAFETY:**  
*Everyone's Responsibility*
